### **Job Title: Project Design Engineer for Municipal Group**

Resource International, Inc., a rapidly growing civil engineering firm is seeking a Civil Design Engineer with at least 4 years of experience with design of municipal water and sanitary sewer engineering projects, roadway and site development.

Position entails performing design and plan production. The ideal candidate must possess:

- A bachelor's or master's degree in Civil Engineering;
- Ability to become a Registered Professional Engineer in Ohio within two years;
- Previous project design ( utility, grading, site design and storm and sanitary sewer systems) experience desired;
- Strong knowledge of and experience using AutoCAD, Civil 3D software packages and Microstation and Geopak/InRoads;
- Strong written and oral communication skills;
- Ability to work and lead in a team environment;
- Ability to manage multiple projects and assignments, work in an environment to learn quickly, take initiative and interact with a variety of people located in Indiana and other Rii offices;

Ideal candidate will be responsible for tasks such as:

- Candidate will have the opportunity to work on a wide variety of projects ( civil/site and water resources).
- Prepare plans, specifications, and detailed design drawings.
- Attend both internal project meetings and meetings with our clients.
- Perform design calculations and conduct investigation analysis towards completion of assigned design tasks and direct preparation of design specifications.
- Perform quantity estimates, detailing and check calculations and drawings.
- Organize scheduling of specific tasks and assignments.

**Why join our team?**
